

Supervisors Training Program (S1, S2, S3 & G2)

Our Aims

To provide candidates with the skills and knowledge required to:

- Apply processes to conduct inspections and identify, analyze, assess risk, recommend treatments, contribute to the implementation of treatments and to monitor risks.
- Participate in the preparation, testing and documentation of site working instructions.
- Implement and apply risk management processes including the application of local hazard identification, formal risk assessment and implementation of risk controls.
- Monitor, report, communicate, review and audit the risk management process and system.
- Apply safety and health investigative processes at an operational level, including the identification and collection of evidence, the analysis of evidence to identify reasons for and the results of the situations, and the identification and documentation of courses of action to resolve and prevent reoccurrence of the issues or problems.
- Effectively communicate information verbally, in written and report form, participate in meetings, make presentations, and participate in operational level negotiations.

Duration of Training

Four (4) Day Course

Assessment

The Units of Competency obtained through the successful completion of the Supervisors Risk Management Training Program are Nationally Recognized Accredited Units, therefore there are a number of assessment tasks that you will be required to complete to meet the required criteria/standard.

Outcomes

Successful participants will receive a Statement of Attainment in:

RIIRIS301A Apply risk management processes

RIIRIS402A Carry out risk management processes

RIIOHS301A Conduct safety and health Investigations

RIICOM301A Communicate information
